---

In accordance with Title 27, California Code of Regulations § 21660.3, please be advised that the County of San Diego Department of Environmental Health Solid Waste Local Enforcement Agency (LEA) received and has accepted an application for a modification of the Solid Waste Facility Permit for the Universal Refuse Removal Recycling and Transfer Facility. The LEA is certified by the California Integrated Waste Management Board (CIWMB) to enforce state laws and regulations at solid waste sites within the County of San Diego.

Description of Proposed Changes: The operator has submitted an application to physically expand the existing solid waste transfer facility building at 1001 W. Bradley Avenue, El Cajon, California. The proposed project includes expansion of the size of the transfer building where

solid waste is transferred and where recyclables will be removed from the waste stream. The expanded facility will allow for the inclusion of a construction and demolition/inert debris and recyclables sorting line. The sorting line will sort recyclable materials from the waste stream. The project does not include an increase in the permitted daily tonnage processed, traffic volume, or change the hours of operation.

LEA Findings per §21665(d): The County of San Diego Solid Waste Local Enforcement Agency finds the proposed change qualifies as a modified solid waste facilities permit. The proposed changes to the solid waste facility do not require that the permit include further restrictions, prohibitions, mitigations, terms, conditions or other measures to adequately protect public health, or public safety, to ensure compliance with State Minimum Standards or to protect the environment in accordance with the California Solid Waste Management Act.

Where can a copy of the permit application can be reviewed?

A copy of the permit application is available for review by appointment at the Department of Environmental Health office located at 9325 Hazard Way, San Diego.
